

Student: Leidong Xu
Journal: Fall 2018
Class: Applied Math I
Instructor: Pietro Poggi-Corradini

Week 1: This week, I attended all the three lecture of Applied Math I and the major topic was going over linear algebra.

References or papers consulted:

- *Matrices: An Introduc...*

Things I learned:

- I went over...

Software Code:

- Create a repository on Github for all the assignments and Journals in the rest of the semester.

Also, only for this week: Personal Intro

Hi, my name is Leidong Xu and have been studying mechanical and nuclear engineering in K-state for five years. This academic year will be the second year for my master degree. My thesis is related to using numerical method solving engineering and science problems on Computational Fluid Dynamics and Nuclear systems, which include preconditioner and multigrid method.
